INDUSTRIAL PORTABLE FUME COLLECTORS

- HEPA Filters
- Fume arm 360° rotation
- Portable with castors & brake function
- Purification of welding & grinding fumes & dust

Welding fumes – fine metal particles produced through welding that can be breathed in – have been classified as carcinogenic. This means employers in mining and other industries where welding takes place must make sure workers are protected, for example by installing welding fume extractors.

HSS-M2 DELTA POINT ~ DRILLS FASTER, LASTS LONGER
BONUS METRIC STEP DRILL WITH EVERY SET
The Delta Point drill bit is completely unlike traditional chisel point and split point drill bits. Delta Point drills have a multi-faceted cutting tip. The overall length of the cutting edge of Delta Point significantly exceeds that of conventional split point drills of comparable size. Although the final design might look complicated the results are simply extraordinary.
